

Imagine if interacting with courses and classmates were as simple as checking your phone. Introducing: The Blackboard App!

AUP Blackboard Mobile for Students

Getting Started

AUP has enabled mobile device access for your Blackboard course sites.

Type in American University of Paris once you have downloaded the app.

You will not need a separate account to access Blackboard Learn.

You'll log in to the app with the same username and password you use for all AUP network resources.

Your device needs one of these operating systems to run the Blackboard app: iOS 11+ or Android 5+

Install app and log in.

Use these steps to download and install the Blackboard app.

1. From your tablet or phone, access the appropriate app store.

Touch ID

The Blackboard app supports iOS Touch ID and Android fingerprint login. After you've set up that feature on your device, you can use your fingerprint to log in to the Blackboard app.

1. Log in to the Blackboard app with your username and password.
2. When prompted to use Touch ID or fingerprint login, tap Continue.
3. If you're already logged in to the app, access Settings from the app's main menu. Tap Touch ID and enable it.
