

Have you experienced a problem in your apartment that you need to get repaired? First, you should come to the Housing Office. Except in an emergency situation, you will need to get a quote for the services that you need. If it is a problem that can be covered by your housing insurance, they will send an expert to check the problem. Often times, you will have to pay for the repairs up front and be reimbursed later on by your insurance company; however, please remember that this can take up to several months of paperwork.

Any company that has SOS in its name should not be used
