

Survey of AI-Related Resources Across AUP

This survey aims to identify resources and services provided by different units across campus that support students, faculty or staff in the use of AI, or in dealing with or thinking about AI (in particular generative AI), in order to

- make these resources/services more visible to the AUP community, by including **brief information provided here** in upcoming AI@AUP email newsletters and other communications
- identify resources for which **more detailed information can be gathered later** (e.g. for future AI@AUP communications to the AUP community, collaborations with or between units, etc.)

Your brief responses would be greatly appreciated! We will incorporate information received by January 23 in an AI@AUP newsletter planned for January 27.

NOTE:

- One person should provide the response for each unit/dept/office
- "AUP Community" refers to any current student, faculty or staff member at AUP
- We're primarily asking about resources/support that relate to teaching, learning, and students' academic experience
- Anything you list in your main responses below should represent something that is currently available and that can be shared in communications to the relevant part of the AUP Community
- If you want to indicate something planned but not yet available, add that in the final "Comments" field

Questions about this survey can be sent to ai@aup.edu, or directly to Jeff Gima or Geoff Gilbert.

* This form will record your name, please fill your name.

1. Unit/department/office

e.g., IT Services, Library, etc.

2. AI-powered tools

What AI-powered tools do you provide?

List any notably AI-powered tools for which you or your unit has a role in making it available to AUP users. For each tool, indicate the following:

- Limits on availability (e.g. numbers of users/licenses/etc.)
- Intended users (e.g. only for faculty, or students, or staff?)
- Link(s) or contacts for more information about the tool, how AUP community members can get access to it, etc.

3. Support for AI tool use

How do you support use of AI tools?

List any ways in which the AUP community can get support from you for their use of AI-powered tools, whether through training, consultation, technical support, etc. For each form of support listed, indicate the following:

- Intended audience (e.g. only for faculty, or students, or staff?)
- Link(s) or contacts for more information about the support.

4. Help with AI issues/challenges

What kinds of help do you offer for addressing issues and challenges related to AI?

List any ways in which the AUP community can get support from you on questions related to critical AI literacy, avoiding or dealing with inappropriate use of AI, ensuring ethical use of AI, or other issues/challenges presented by AI. For each form of support listed, indicate the following:

- Intended audience (e.g. only for faculty, or students, or staff?)
- Link(s) or contacts for more information about the support, how AUP community members can get access to it, etc.

5. Comments

Add here any comments, suggestions, etc. If there are resources that you plan to provide in the future, or that you would like to be able to provide, you can share that briefly here. These comments will not be included in the upcoming AI@AUP newsletter.
